EDUCATION

UC San Diego B.S. Mathematics and Computer Science - Provost Honors December 2019

- **Coursework:** Computer Security, Operating Systems, Cryptography, Data Science, Recommender Systems

EXPERIENCE

Microsoft Software Engineer Intern | OneDrive Sync Engineering July 2019 - Sept 2019

- Designed, Prototyped and Delivered a custom rules engine used by 100M+ users to optimize **One Drive Sync Client**
- Engineered an end-to-end client facing feature allowing personalized rule customization for power users
- Developed efficient pattern matching algorithms to model filtered data syncing to reduce sync latency
- Technologies Used: **C++, Azure Devops, Windows Shell API**

PayPal Software Engineer Intern | Core Payments Team June 2018 - Sept 2018

- Deployed **Highly Scalable** automated internal tools to analyze & optimize Coverage Data for the **Payments Engine**
- Implemented features actively used by the company to fine-tune system stability & eliminate redundancies
- Technologies Used: **Java, Spring Framework, Apache Maven, Apache Groovy, Jenkins, IBM ODM API**

UCSD CSE Department Undergraduate Teaching Assistant | Professor Gary Gillespie Jan 2018 - Present

- Leading office hours/discussions, grading homeworks/exams & teaching essential software engineering tools
- Analyzing/debugging students code & explaining key programming/software engineering concepts
- Tutoring **Data Structures**, Software Tools and Techniques Lab, and **Object Oriented Design** Courses
- Technologies Used: **C, C++, Java, Python, AWS, Valgrind, GDB, BASH, Unix, Firebase, Travis, Git/Github**

Triton Software Engineering Project Manager Jan 2018 - Jan 2019

- Leading a cross-functional team of developers/designers & responsible for overseeing quarterly projects
- Delivering reliable pro-bono technical services for non-profits using **Agile Development** Methodologies
- Holding weekly staff meetings, discuss forward planning and setting target goals for new and ongoing projects

San Diego Supercomputer Center Undergraduate Research Assistant Feb 2018 - June 2018

- Designed interactive online software to collect user metrics & further research efforts on **Internet Topology** at **CAIDA**
- Gamified crowdsourcing data collection tasks to increase user interaction & analyze millions of IPv6 traceroutes
- Technologies Used: **Python, Django, JavaScript, MongoDB**

PROJECTS

Hash for Cash Awarded Best Use of Linode API at LA HACKS April 2018

- Mitigated DDoS attacks, prevented data theft & mined **Bitcoins** by harnessing wasted computational power
- Technologies Used: **Python, JavaScript, JQuery, Django, MySQL, SHA-256**

Food vs Lifestyle Data Science/NLP Research Project March 2018

- Researched correlations in student dietary choices, academics and satisfaction through **Sentiment Analysis**
- Technologies Used: **Python, Natural Language Toolkit (NLTK), Scikit-learn, NumPy, SciPy, Pandas, Keras**

Whispering Pi Voice Controlled IoT Smart Lamp Dec 2017

- Developed a self-aware hardware system with **voice recognition** functionality using custom Amazon Alexa skills
- Technologies Used: **C, Python, JSON, SQL, REST API, Raspberry Pi**
